WESTERN MANAGER

THE rapid expansion of the colonization work of the Canadian National Railway in Western Canada, and the excellent results obtained during 1924 under the direction of Mr. E. A. Field, the formation of plans for the active extension of this work during 1925, and some staff changes. Formal announcement is now made that during January 10th, 1925, Mr. E. A. Field is appointed Western Manager of this department with headquarters at Winnipeg, an appointment which will meet with very general approval throughout eastern and western Canada where Mr. Johnson is favorably known as a first class agriculturalist, stockman and business executive.

Born on the Kinsmen's farm at Headingley near Winnipeg, in 1884, which farm was at that time managed by his father, Mr. Johnson, his early years received a very thorough training in agriculture, both theoretical and practical. His studies were pursued at Upper Canada College, Toronto, and at the University of Alberta, Edmonton, and at the University of Saskatchewan, Saskatoon. He was graduated in 1908 with the degree of Bachelor of Science in Agriculture. From this date until 1915 he was engaged on the land as a practical farmer at Myrtle, Ontario, and North Battleford, Saskatchewan, gaining in the period invaluable experience of the farmer's problems as they are encountered in actual operation. Having by this time acquired a reputation as a stock-raiser, he was in August, 1915, appointed Market Representative of the Dominion Live Stock Branch at the Union Stock Yards, St. Boniface, and in 1918 Supervisor of Stock Yards, charged with the enforcement of the Live Stock and Live Stock Products Act of 1917, and further promoted in 1920 to be Chief of Stock Yards Service for the Dominion Government.

On Jan. 1st, 1925, Mr. Johnson resigned his position with the Dominion Government to become Agricultural Agent for the C.N.R., and was appointed General Agricultural Agent on Feb. 1st, 1925. His wide experience with agricultural, live stock, and land settlement matters, and extensive acquaintance with those directly connected in such matters, will be of considerable assistance in the performance of his new duties, which, in view of the immense importance of active colonization work to western Canada and the Canadian National Railway, affords almost unlimited scope for his activity. Among other features of the work receiving Mr. Johnson's personal direction is that of the Employment Service for farm help which the Colonization Department has organized as a matter of placing newly arrived immigrants in farm labor.

Oyen W. L.

The January meeting of Oyen W. L. was held at the home of Mrs. S. A. Miller; Mrs. Long presiding. 16 members were present. Committees reported considerable relief work done. Christmas cheer had been given where necessary, a basketball ball had been procured for the school and \$50 had been donated to this school skating rink.

After an enjoyable program, lunch was served by the losing "Membership Drive" team.

The next meeting will be held at the home of Mrs. Corcoran on Wednesday evening, February 18. Roll call will be answered by "My Favorite Canadian Author".

Alberta's Exports

Exports of Alberta products direct from the province to points in the United States totaled in value \$5,982,010 in 1924, compared with a total value of \$4,388,149 in the previous year, according to the report prepared by S. C. Reat, American Consul for Alberta.

Figures for the Calgary district show a considerable increase in export of cattle to the U. S. and for both Calgary and Edmonton a considerable increase in hog exports.

Trade with the Philippine Islands was an interesting feature of the year's exports. Calgary district shipped 908,400 barrels of flour there, and Edmonton shipped 17,500 lbs. of butter to the islands.

The value of products exported to the U. S. from each consular district was as follows:

1923	1924
Edmonton \$2,755,925	\$2,272,007
Calgary \$2,127,916	\$1,159,808
Lethbridge \$701,399	\$396,033

Cattle exports from Calgary increased from 1933 head in 1923 to 11,077 head in 1924 from the Edmonton district the increase was from 336,388 in value to \$143,139 in 1924. Hogs exported from Calgary to U. S. increased from 23 head to 5405 head. Large increases in meats and fish, furs and lumber are noted from Edmonton, and in livestock from Lethbridge.

Calgary Complete First Square

The "Square Draw" Croquet Cup competition was concluded last Saturday night. The standing of the rinks is given in the table below.

Dunford	Won	Lost	Per cent
10	2	833	
Wade	9	3	750
Peterson	7	4	636
Barbour	6	5	545
Dial	6	5	545
Lecca	6	5	545
Carboneau	5	6	454
Morrison	5	6	454
Kelly	4	7	363
Miller	4	7	363
Whitlock	3	8	272
Lake	2	9	181

Note: Dunford and Wade were tied at conclusion of draw, with 9 wins and 2 losses each. Percentage .818. In the game played off to break the tie Dunford won.

Alberta Exhibition Dates

Dates for Calgary and Edmonton Exhibitions for 1925 were set last week for July 6 to 11 at Calgary and July 13 to 18 at Edmonton.

Buffalo to be taken North

Seven hundred head of buffalo from the government park at Wainwright, Alberta, are to be taken north the coming summer and given their liberty in the wild buffalo reserve on the Slave River.

Pools Have Headquarters at Edmonton

The livestock and dairy pools now in process of formation in the province have established headquarters offices in Edmonton. The head office of the egg and poultry pool is at Calgary.

Illogical and Unsound

In giving consideration to the tariff solely as an economic question and quite apart from any partisan bias—while, let it be emphasized, should have no bearing on the subject—some attention may be devoted to a recent review of Canada's textile trade with the Eastern powers.

It is declared that with some 270 woolen and knitting mills scattered throughout the Dominion, business is worse than depressed; that, in fact, a serious situation faces this industry. Yet the textile industry is one of the protected industries of Canada. True, it claims that its tariff protection is not sufficiently great, and the chief burden of its present complaint is that, under existing conditions, the Canadian industry cannot compete successfully with the mills of Great Britain and the continent of Europe. So the tariff should be raised in order to restrict such importations into Canada or keep them out altogether.

But could the Canadian mills succeed if the tariff was made twice as high as it now is? According to the authority quoted in the review already referred to, Canadian mills are every bit as efficient as those of Yorkshire, that classically Canada is well adapted to the business of spinning and weaving, and that our Canadian workmen and workwomen are equally well qualified for the work. Then what is the difficulty?

In the first place, it is stated that the sheep raising industry in Canada has been badly neglected, that we should have twenty million sheep instead of two million, and to this connection it is pointed out that Great Britain in her small area supports twenty-four million. As a consequence Canadian mills are forced to import their raw materials, for which no less than \$32,000,000 was paid in 1922.

The second difficulty confronting the Canadian mills is said to be the cost of labor, and it is pointed out that wages paid in the textile mills of Great Britain are only one-half those paid in Canada, while on the Continent wages for these workers are only one-quarter of what is paid in this country, and, inasmuch as the labor bills in this country approximate the cost of raw materials, that it is easy to figure out why Canadian mills cannot compete successfully with British mills.

In the third place it is pointed out that the tariff on woollens and knits goods entering Canada has been lowered rather than raised during recent years.

What the Canadian textile industry lacks, therefore, as set forth in this review, is home-grown raw materials, cheap labor and sufficient protection against British and foreign goods.

There are two ways in which cheaper labor can be secured in Canada. One is by reducing the higher standard of living prevailing in Canada as compared with Great Britain and the Continent, but the Canadian workman and workwoman do not wish to have their standard of living lowered, nor do the people of Canada as a whole desire it. Such a retrograde step would never be welcomed in this country. It would be bad business for the whole Dominion.

The other way is to reduce the tariff on all those things which the workers must buy, and this, while not reducing the standard of living, reduces its present abnormally high cost. If it did not cost the worker so much to live in decency, provide for and educate his children and make provision for his old age, he could afford to accept a somewhat lower wage. But so long as the worker has to pay top prices for everything he must buy, just so long must he be paid higher wages and higher wages than in Great Britain and elsewhere where artificial means are not employed to protect industries and thereby increase the cost of living for everybody.

And how is the textile industry in Canada to be encouraged? There are ways which have been in tariff protection for themselves, the textile manufacturers would hardly welcome the imposition of high tariff duties on raw wool. Their complaint is that they have to pay too much now, and they want to be able to get the home-grown article in sufficient quantities at lower prices. But how is the Canadian sheep raiser to increase his flocks and produce large quantities of cheaper wool, and at the same time be forced to buy clothing, lumber, hardware, food and other supplies in a highly protected market and pay the high wages necessary to his employees likewise forced to buy in that self-made protected market with its resultant high prices for everything?

Protection through tariffs is not a principle. It is artificial and unsound. What is one man's raw material is another man's finished product, and the moment protection is afforded to the one to help his particular branch of industry it works injustice on another, and can be, in turn, protected, an injustice is perpetrated on a third person or industry. Protection thus becomes a vicious circle.

The textile industry furnishes a concrete example of this. Wool is the finished product of the sheep raiser. Protect it and you increase the cost of the raw material of the textile manufacturer. Woolen goods and yarns are the finished product of the manufacturer, but they are the raw materials, the necessities of life, of the average male and female worker. Protect them and the worker must demand more for his labor if he is to live in decency and comfort. And this labor is again the raw material of both the sheep raiser and the manufacturer.

Placing up tariff protection will never solve the difficulties of the textile industry, nor of any other industry. It is economically unsound.

Coke Coal Inquiry

The investigation into an alleged combine among Winnipeg coal dealers, conducted by Commissioner David Campbell, has been closed. Commissioner Campbell will submit his report to the minister of labor in Ottawa.

Citizens of Pasadena, California, have subscribed to a fund for the building and equipment of a community playhouse to be opened soon.

It's easy for a man to do right with money. It's hard to do anything else.

Proven directions on each package. Physicians everywhere recommend it.

An Unusual Damage Suit

U.S. Town Asks Compensation For Building Damaged By Airplane

The town of Elliot, Me., is asking compensation from the Federal Government because an army airplane recently crashed against the town hall and damaged it. Army headquarters received from the war department the claim sent to Washington by Major Sullivan, of the Fifth Infantry, stationed at Portland, Me., was ordered to Elliot to investigate.

The accident in which the town hall was damaged occurred when an aviator, flying from Minotola, N.Y., to Boston, became lost in the night and flying close to earth he struck the Elliot town hall. The plane was damaged, but the aviator escaped injury.

WORRIES IN THE HOME

It Is These That Cause Many a Breakdown in Health

Almost every woman at the head of a home knows just what worries in her household affairs. They may be too small to notice an hour after they occur, but in the long run they work that break down the health of so many women. These effects may be nervous headaches, sickle appetite, indigestion, sleeplessness, irritability and a salivary complexion. To those afflicted in this way Dr. Williams' Pink Pills, by improving and purifying the blood, bring speedy relief. Among thousands of weak women who have tested and proved the merits of this medicine is Mrs. George W. Bruns, of New York, who says: "It is with profound thanks that I write to tell you that Dr. Williams' Pink Pills have done for me what I was just what I needed. Under their use my appetite returned, my nerves were calmed, my sleep bettered at night, and gained in field as well as strength. The result is that I am now a perfectly healthy woman, and there is no doubt that it is due to the use of Dr. Williams' Pink Pills, a supply of which I now always keep in the house. I can only advise other women to do the same." You can get these pills through any dealer in medicine, or by mail for 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

B Circuit Fairs

Dates For Holding Fairs In This Class

Full dates of B circuit fairs have been set as follows: Carman, Man., June 20 to July 1; Portage, Wis., July 6 to 7; Dauphin, July 9, 10, 11; Yorkton, July 12, 14, 15; Melfort, July 16, 17, 18; Estevan, July 20, 21, 22; Weyburn, July 23, 24, 25; Swift Current, July 27, 28, 29; North Battleford, July 30, 31, and Aug. 1; Lloydminster, Aug. 3, 4, 5; Vermilion, Aug. 6, 7, 8; Camrose, Aug. 10, 11, 12; Red Deer, Aug. 13, 14 and 15.

The only Alberta dates still to be definitely decided are those of the bridge which will be set tentatively on August 16, 17 and 18.

Recognized as a leading species for the destruction of worms, Mother Gray's Worm Expeller is a safe and effective remedy for children everywhere. It seldom fails.

Many Find Employment

Saskatchewan Second to Ontario in Number of Positions Found for Unemployed

Saskatchewan was second only to Ontario in the number of positions found for unemployed during the fiscal year ending March, 1924, according to the annual report of the Employment Services of Canada, just issued.

Ontario placed 170,475 men and women; Saskatchewan, 52,114; Manitoba, 46,817; British Columbia, 55,432; Alberta, 54,101; Quebec, 39,958; Nova Scotia, 10,765; New Brunswick, 9,713.

Only the unfortunates under the agency of corn. The knowing ones apply Holloway's Corn Remover and get relief.

Observatory For South Africa

Photographic Lens Will Be Third Largest in World

Dr. Frank Schlesinger, director of Yale Observatory, accompanied by two assistants, has gone to South Africa to establish a branch observatory there. He is taking the new 26-inch photographic lens made especially for the new observatory, and by Dr. Schlesinger did not care to send it by freight, officials of the steamer on which he travels put it into a submarine by itself.

"There is no really good observatory in the southern hemisphere and we are going to establish one," said Dr. Schlesinger. "It has not been determined yet, however, whether it will be at Johannesburg or at Bloemfontein. The photographic lens that Dr. Schlesinger is taking to South Africa is the third largest in the world."

If a thing is fashionable because it is expensive it is usually expensive because it is fashionable.

Deals With Farming Conditions

Interesting Address Delivered At Meeting of Saskatchewan Agricultural Societies

Addresses and discussions of great educational value featured the programme of the annual meeting of the Saskatchewan Agricultural Societies, which was held recently in Saskatoon.

The Saskatchewan Agricultural Societies embrace one hundred and fifty-four societies. The association has been in existence for forty years, having been organized in 1884. It now has a paid-up membership of 2,000, and is growing slowly but steadily each year.

Mr. N. B. Williams, of Abernethy, president of the organization, was one of the most interesting speakers at this meeting and dealt with several topics of interest to his hearers.

At this time we met under conditions somewhat different to those that have prevailed during the past few years; not that it can be said that there is a very marked improvement in the financial condition of the farmer as a result of the business year of the province, yet I am convinced that the year 1923 opens with a more hopeful and more optimistic outlook all round than did the year 1922.

The economic situation of the province is better than it was a year ago. The farmers of the province are better equipped than they were twelve months ago, and the financial condition of the farmer as a result of the business year of the province, yet I am convinced that the year 1923 opens with a more hopeful and more optimistic outlook all round than did the year 1922.

QUESTIONS TO BE DEALT WITH BY PARLIAMENT

Ottawa.—The last gun of the royal salute has been fired, and another parliamentary session is under way. The King's will has been made known to his commons through the speech from the throne, and the people's elected representatives begin this week to discuss the "humble" speech in acceptance, which is the invariable forerunner to the general work of Canada's principal legislature.

Chief among the measures forecast in the King's speech are those dealing with freight rates on land and sea. Senate reform, the most outstanding of the legislation expected, is to be submitted to a conference between Federal and Provincial Governments before parliament is asked to consider in detail an amendment to the constitution of Canada with respect to the constitution and powers of the Upper House.

In brief, the speech from the throne indicates that the government intends to seek parliament for legislation to give:

1.—Equalization of freight rates between provinces and territories.

2.—Government control of ocean rates.

3.—Improvement in equipment of ports on both coasts, and on the St. Lawrence River.

4.—Colonization and settlement (which implies railroad construction) in the Peace River district.

5.—An act to amend the Grain Act. Proponents already have indicated that the official (Conservative) opposition will attack its policy of protection for all industries, including farming and fishing. The Progressive party will focus its attention on this section, and demand lower freight rates from and to Western Canada.

Closer Butte Inspection

Want Legislation Passed in Saskatchewan to Protect the Consumer.

Prince Albert.—A resolution sent in by Mr. Smith to the Saskatchewan legislature, passed last night, is reported that in at least one of the provinces, but not in the others, the consumer to be more completely informed as to the quality of the goods he is buying. The resolution is intended to require that all grain better than the grade on the "wheat" for that government butter graders have authority as inspectors to secure samples from retailers, and to make it known and see that the actual grade corresponds with the grade as shown on the wrapper. The resolution passed.

Cannot Solve Opium Problem

Sub-committee Fails Completely to Find Way Out.

Geneva.—The only action reached here on the problem of opium smoking in the Far East was an agreement to disagree. Such was the negative result of a meeting of the sub-committee of the International opium conference, appointed as a last resort, in an endeavor to find a way out of the conflict between the United States delegates and those of the European powers with far eastern possessions. The future of the conference was regarded as exceedingly dark.

"Photographing the Great Britain.—The National Portrait Gallery, which is compiling photographs of the distinguished men and women of Great Britain, has found that more women than men refuse to pose for their photographs. Many of the leading British women also have refused to approve the photographs. Only one man in the collection was a non-complier, who being the photographer, Mr. W. A. A. Chubb.

"Earthquakes in Norway Oslo, Norway.—Fifteen earthquakes, some of considerable violence, accompanied by explosions and reverberations, have occurred in Southern Norway during the last fortnight, breaking 156 feet in length by three in width were opened in Sogn and Fjord.

"SORE THROAT Don't take the chance of getting pneumonia. Check the throat with Mynars. It's half a teaspoon internally in molasses and rub Mynars on throat about chest. Quick relief.

"Mynars "KING OF PAIN" Mynars

Wheat Board Surplus

Premier Dunning Says Distribution of Funds Arranged For

Regina.—The distribution of the wheat board surplus monies is arranged for and it fully expect when the surplus will be free to deal with the amount it receives according to the judgment of its own legislature. This statement was made by Premier Dunning upon his return to the city after an absence of two weeks in Eastern Canada, when he presented to the Federal government the resolutions adopted at the last session of the Saskatchewan Legislature bearing upon federal matters. Mr. Dunning discussed each resolution in detail with the minister concerned.

"While, of course, no definite statement can be made on matters of policy except to parliament," said Mr. Dunning, "I have reason to believe that action will be taken in connection with a number of matters dealt with in the resolutions."

New Canadian Loan Surprise To London

Placement of \$5,000,000 Six Month Treasury Notes Expected

London.—In connection with the recent announcement by the Canadian government of the proposed reduction of the early date of maturity of the loan, it is expected that the government will place a new loan of \$5,000,000, it was assumed here the government at Ottawa had decided to place a new loan, but intended to postpone the redemption of the recent heavy borrowing in New York. The stock market here, however, was surprised to find a line of \$5,000,000 Canadian six month treasury bills had already been placed here at a 4 per cent discount in order to provide for the necessary maturity.

The anticipation that this portion of the flotation here shortly after the sterling loan is not generally entertained.

Lives Lost In Snowslide

Avalanche in B.C. Demolishes Ranch House and Kills Two People

Nelson, B.C.—Two lives were lost and a ranch house destroyed, and a railway line closed for the season, as a result of a snowslide which occurred last night in the Selkirk range, near the town of Nelson, B.C.

A snowslide at Queen's Park demolished last night the house of John H. Hoyle, killed Mr. and Mrs. Hoyle in their beds, and carried away the upper part of the house in which they were sleeping.

John Hoyle, aged 36, and a young man servant had their rooms. Woman Hoyle and the woman made their escape through the roof. The bodies of the aged couple were dug out later.

Princess Albert.—The Saskatchewan Government is considering provision for giving boys and girls on the farms of the province some form of agricultural instruction.

This announcement was made by Hon. C. M. Hamilton, minister of agriculture, as a consequence of a discussion at the Saskatchewan agricultural convention here.

City boys of the province over their country cousins in the competition for the title of "best farmer" in the province. The boys showing made by the college students demonstrated that it was not enough to have intelligence and ideals, but good training was also necessary. The government therefore had under consideration the provision of some form of instruction that would give the boys and girls on the farms the same careful instruction as those in the cities are receiving at the collegiate institutions.

Professor Shaw said that the result of the competition of the boys of the country was not every bit as smart as the apartment block boys, but they had better training from well equipped schools.

There was no finer agricultural work carried on in the province and a number of the boys showed a keen interest in judging at one of these contests had won honors for themselves and the province in national and international competitions and the brightest boys were generally the dairy boys, whose fathers were generally only two or three jumps ahead of the other fella.

May Reduce Price Of Soldier Settlement Land

Ottawa.—A revolutionary proposal as to soldier's land, held under the operation of the Soldiers' Settlement Board, is in prospective shape of legislation. Late in the month of the house favored a rebate of interest and a marked easing up in regard to payments for stock equipment. This has been considered to go about it the wrong way. What is now proposed is the constitution of an authority, to which the soldier farmers may appeal, if they consider the amount they paid for their land is excessive, under present conditions. In the event of a case being established, the value of the land could be reduced and with it the obligations of the purchaser.

None Epidemic Under Control

No Extra Nurses Required Is Message From Doctor

Seattle, Wash.—The diptheria epidemic in Nome, Alaska, is under control, cases have been reduced to a portion of 300,000 units of antitoxin which arrived from Nome, Alaska, late in the month of the house favored a rebate of interest and a marked easing up in regard to payments for stock equipment. This has been considered to go about it the wrong way. What is now proposed is the constitution of an authority, to which the soldier farmers may appeal, if they consider the amount they paid for their land is excessive, under present conditions. In the event of a case being established, the value of the land could be reduced and with it the obligations of the purchaser.

"I am not worried about the situation," Dr. Webb's message said, "I have used 30,000 units of antitoxin. There are twenty-nine typical cases, thirty-five suspects, and five deaths to date. Send no nurses. There are four in hospital here and five others we can call in emergency."

FOR INSTRUCTION OF RURAL YOUTH IN AGRICULTURE

Princess Albert.—The Saskatchewan Government is considering provision for giving boys and girls on the farms of the province some form of agricultural instruction.

This announcement was made by Hon. C. M. Hamilton, minister of agriculture, as a consequence of a discussion at the Saskatchewan agricultural convention here.

It is an art to paint a work of art and it is still more of an art to sell it.

Granite monuments of the Egyptians were cut with copper chisels.

Nearly half a million sacks of Canadian cement have gone into the lining of the tunnel, Mr. Cotterell says, and the work represents the biggest undertaking of its kind on the American continent. The tunnel is now lined with a concrete jacket 12 inches thick throughout its entire length of five miles.

the context of moving about a thousand head of buffalo from Wainwright to the Hay River district, north of the Peace River, according to information received by the Canadian National Railways at Winnipeg. The animals will be taken over C.N. lines to Wainwright, on the Athabasca River; near Fort McMurray, whence they will be taken down the Athabasca River by boat to a point beyond Lake Athabasca; there they will be turned loose to mix with the herd of wood buffalo which ranges in that part of the country. Several thousand head will be moved from Wainwright during the next five years as the herd there is now so large that the annual increase exceeds the grazing possibilities of the park.

A young man about to be married went to see the clergyman to ask him to perform the ceremony.

"Is your intended wife a spinster?" the clergyman asked.

The man thought for a moment and then he replied: "No, sir; she's a dressmaker."

the largest site is filled with vibrant north woods.

In addition to Vancouver Island's heritage of natural scenic beauty, climate and attractions for motorists and fishermen, a new means of recreation is to be provided by Crystal Garden. It will be built on the Indian Park & Railway. It is a winter garden that can be used by small day, and brilliant with light by night, when music is played. The garden is a 10-acre plot of land facing the Emerald Gardens with their riot of roses.

Crystal Garden will be of generous proportions. It will be surrounded by brick and concrete, and the superstructure of steel and especially de-

signed glass. The interior will eventually be a huge conservatory, protection having been through for growing plants, palms and orchids, while the concrete will feature the largest water swimming pool on the continent.

To give a Roman bath effect, concrete stairs will lead down from Peacock Alley promenade and the dancing floors above to the pool, which will be 150 feet long, 40 feet wide and 5 feet deep. The pool will be surrounded from Beaton Hill, maintained at a temper-

ature of 70 degrees, and kept in constant circulation. It will be fertilized, and bathed, by a series of waterfalls, and the waters of varying temperatures and other attractions planned at present Hotel, are a gymnasium, a water hockey tank, offering a more similar to Atlantic City, Peacock like Atlantic City, and frequent "Princess" visitors.

And indeed Vancouver, Vancouver Island and Canada, scattered along the motor road radiate from Victoria.

The Oyen News

About Town and Country

Pay your taxes.

Born--To Mr. and Mrs. Jack Brinacomb on Thursday February, 5 at Oyen Hospital, a son.

Born--To Mr. and Mrs. Jack Scott on Sunday on Friday, February, 5 at Oyen Hospital, a son.

Born--To Mr. and Mrs. Andrew Wendling of Oyen, on Wednesday February 11 at Oyen Hospital, a daughter.

Under the auspices of the Oyen Agricultural Society a 2 day Agricultural Course will be held in Oyen on February 23-24. See hand bills or any of the officers of the society for information.

On Friday evening, February 13, three plays will be performed in Glenada School, in the form of a competition between Hudson Heights Local U.F.A., Bush Centre W.L. and Glenada Junior U.F.A. This will be a worth-while program.

The Lady Curlers of Oyen, will give a whist drive, and dance in the Masonic Hall on the eve of February 19. Old time music. Price 50 cents each, Supper included.

Two Oyen rinks are attending the Youngtown 'spiel' which started yesterday. The personnel of the rinks is as follows: H. Lamot, Geo. Morrison, H. McMurray, and J. Naimsmith, etc. S. Traxen, E. D. Thygeson, James Lees and Fred Lake, etc.

Gordon Caswell left on Saturday for Calgary, en route to Milo, Alta., where he has been given the management of the U. G. G. elevator at that point.

The westbound train now leaves Oyen at 12:43 a.m., daily except Monday. The eastbound train now leaves at 3:28 a.m., daily except Sunday.

Say you saw it in the News.

In Lighter Vein

"Did your last employer give you a reference?"

"Yes, but it doesn't seem to be very good."

"What did he say?"

"He said I was one of the best men his firm had ever turned out."

Motor cars will be finished in brighter colors in 1925, according to a trade magazine. It will be much nicer to be hit by a pretty one.

Mrs. Mallor-Prop--I certainly shan't invite Mrs. Hokey to our "at home." I entertained her once, before and she never recuperated.

It doesn't really matter if your sins do find you out, says the local wag. The neighbors would any way.

Etiquette Note: It isn't necessary to get on your knees to propose if the girl happens to be sitting on them.

Radio sets are like children in one respect, thinks the local wag. They hardly ever can be coax- ed to perform right when company is present.

"Don't forget Herb, my first rock falls away--" (15 ball in the side pocket).

The Dial rink, which attended the Kindersley 'spiel' last Saturday, bringing with them the second prize in the Grand Challenge. Getting away to a good start they recorded seven straight wins in two competitions before meeting defeat. The personnel of the rink was: Harry Matze, lead; George Morrison, second; H. McMurray, third and B. H. Dial, skip.

Congratulations "Father".

P. H. Peterson, returned to Oyen yesterday, from Wakaw, Sask., and expects to stay here till spring.

John F. Miller, Alberta's eye sight specialist, of 404 Underwood Block Calgary, will be at the hotel in Oyen on Saturday February, 21.

Mr. and Mrs. R. E. Gillespie, who spent the past week in Calgary returned to Oyen last Saturday.

Mr. N. H. Shaffer, who has been residing in British Columbia, returned to Oyen last Saturday to spend two weeks, on his farm in the Cappon district. Mr. Shaffer expects to leave for Minnesota during the last week of this month.

I have taken over the Home Grain Coal sheds and have Newcastle and other high grade coal on hand at all times. --O. F. Kirkpatrick.

Here and There

Rex Beach, the eminent American author, was recently in New Brunswick as a guest of W. G. McIntyre. On leaving for his home in the United States at the conclusion of his visit, Mr. Beach expressed himself as a strong booster for the hunting and fishing possibilities of the province, charmed with its scenic beauties, delighted with its people and solemnly proposing to return with his gang next year.

The largest and one of the most valuable shipments of foxes ever to pass through Montreal, Que., by Dominion Express Company, was handled by that organization recently. There were 35 animals in the shipment, valued at \$17,000, 30 being silverblack foxes and the rest black foxes. The former were destined for exhibition at Minneapolis, while the latter went to different points in the Canadian West.

The Eastern International Dog-Bird Derby, which was so successful last year, will again be held at Quebec in 1925, the dates set being February 19th, 20th and 21st. As on former occasions, the distance to be covered will be 120 miles, at an average rate of 40 miles a day. Earl Briggs, Le Pas, Manitoba, now holds the handsome trophy awarded for the race and is expected to defend his honors. Many teams are already working out.

A decided acquisition to Trois Rivières, Que., is the new Canadian Pacific Railway station, which was opened there on November 8th. The building is Italian in design. Rose and Macdonald, of Montreal, were the architects. Remarkable speed was made in the construction, as the contract for the work was only signed on June 2nd last. The opening ceremony was performed by Grant Hall, vice-president of the company, in the presence of many notables.

Three moose and one deer was the total bag of W. B. Leeds, Jr., young American multi-millionaire, and his friends, Nils Piorman, Albert Hopkins, Paul Smith and Mortimer Davis, Jr., as the result of their recent hunting trip into the Kipawa district. The leader of the party expressed himself as delighted with the results, as he had not hoped for such luck. Great quantities of game of all kinds were seen.

Perhaps the most remarkable, certainly the first aerial stowaway in history was discovered by Pilot Caldwell of the Laurentide Air Service, operating in the neighborhood of the Rouyn gold-fields, the other day. Caldwell, on rising for a long flight, found his machine so badly balanced as to be almost unmanageable. Cigarette butts and other clutched to the uncovering of the extra weight, which turned out to be a miser. As the man had taken this cheap but decidedly dangerous way of reaching civilization in order to see his sick wife, he was not detained or punished.

That the Land of Evangeline (Nova Scotia) now ships over 2,000,000 bushels of apples abroad annually was the recent statement of P. G. J. Cosman, general freight and passenger agent, Dominion Atlantic Railway. A number of British apple growers and buyers are at present putting large tracts of land under fruit. With the apple growing industry increasing from year to year, at the rate of two to three hundred per cent per decade, only twenty per cent of the orchard land available in the province is yet under fruit.
